# ONECOLLECTION

## TIME CHAIR.

The Time Chair is a dynamic and comfortable conference chair designed by Henrik Tengler in 2012. The chair is purposely designed not to follow current trends. Instead its aesthetic resembles the cosmopolitan functionalism of the Bauhaus period.

The 12 mm steel tube construction of the chair ensures unbeatable strength in spite of the delicate expression of the chair. The oversized cushions create a titillating exchange between the carrying and carried elements of the chair.

The chair allows for dynamic use and positions by responding to your movements. With clever features and ergonomic support, the Time Chair provides a high level of comfort throughout the day.

## PRODUCT INFORMATION
